

Energy Assessment Workshop

FOR COMMERCIAL PROPERTIES

Wednesday, December 9, 2009

8:00am – 12:00pm

Liberty Place, 313 W. Liberty Street, Lancaster PA, 17603

Join facility owners, facility managers and contractors for a comprehensive energy assessment workshop. Learn to identify the most effective energy saving opportunities in your building, compare your facility to similar buildings in the region and review national trends toward LEED certification.

This workshop will provide specific information on:

- Energy billing analysis
- Energy audits and assessments – working with experts or completing your own
- Energy saving strategies

Take this opportunity to ask questions and learn from Marcus B. Sheffer, an energy assessment expert with over 25 years of experience in energy saving strategies for building retrofits that includes building controls, lighting retrofits and system replacements.

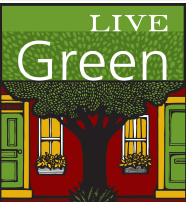

Invited guests from the PA Department of Environmental Protection will conclude the workshop with a summary of funding opportunities currently available from the state and federal government to support energy assessment upgrades.

ABOUT THE WORKSHOP TRAINER:

Marcus B. Sheffer is an energy/environmental consultant with over 25 years of experience. His company, Energy Opportunities, Inc. provides technical consulting services on projects relating to energy management, efficiency and conservation, renewable energy systems and the environmental impacts of human enterprises. Mr. Sheffer is also a partner in 7group, a multi-disciplinary team of professionals focused on sustainable development. He serves on the US Green Building Council as Chair of the Energy & Atmosphere Technical Advisory Group. Professional memberships include ASES, ASHRAE, IESNA, and the USGBC.

Lancaster County Center of Excellence
in Renewable Energy

Funding for this workshop is provided by the PA Department of Environmental Protection, Energy Harvest Fund and the Lancaster County Center of Excellence in Renewable Energy.
