

SIGHT & SOUND MILLENNIUM THEATRE

Breathtaking and awe-inspiring are both terms which visitors used to describe Sight & Sound's Millennium Theatre. Putting the creative vision of Glenn Eshelman into working drawings and finished products, the design/build team of Horst Construction and Cornerstone Design • Architects, delivered an award-winning performance. They received a standing ovation for delivering the project ten days early and substantially under budget. After all, the show must go on!

Property:

Sight & Sound Millennium Theatre

Location:

Strasburg, Pennsylvania

Project:

2,050-seat theatre, offices, set production, ticketing and reservation offices

Architect:

Cornerstone Design • Architects

Square Footage:

150,000

Special Features:

In a monumental feat by the entire team of Sight & Sound, Cornerstone Design • Architects and Horst Construction, this 150,000 square foot facility was designed, constructed and opened in only 18 months! A fast-track project, rehearsals began in the auditorium while the structural steel was being placed for the lobby.
